

You know computers, batteries, and fluorescent lights need to be recycled. Now you also know where to bring them.

Enviro-Clean from St. Croix Electric Cooperative makes recycling computer equipment, batteries, fluorescent tubes and compact fluorescent bulbs simple. Co-op members and the general public are encouraged to drop off their recyclable materials at the cooperative offices in Hammond during normal business hours. The co-op brings this convenience to the local community and our members as a public service - the fees noted cover some of the expense associated with recycling and do not generate money for the cooperative.

## Computers, monitors, scanners, peripherals, printers

Members: \$7.50 per item  
Non-members: \$12.50 per item

## Alkaline, lithium, ni-cad and mixed batteries

Members: no charge
