

Electric Heat is Safe, Affordable, Efficient

Electric heat is energy efficient, clean and predictable. Call St. Croix Electric Cooperative today to discuss heating options and learn about available incentive programs.

TYPE	DESCRIPTION	WHERE USED
Plenum Heat Insert	An electric heater is installed in a furnace. Owner chooses which fuel source to use based on current fuel prices.	Entire home
Radiant Heat	Radiant heat fixture is hard-wired onto a wall.	Single-room heating, basement, workshop, garage
Air-Source Heat Pump	Unit transfers heat between house and outside air; limited heat in winter, AC in summer.	Entire home heat and air conditioning
Ground-Source Heat Pump	Unit harnesses heat beneath the Earth's surface to operate a heat system or AC system.	Entire home heat and air conditioning
Electric Boilers	Boilers heat water that circulates through in-floor tubing or baseboard heaters.	Basement, bathroom, kitchen, shed, entryway
